

Model	Weight (lbm)	Depth (in)	HP	Working Width (in)
SICMA RG 305	2275	8	90 to 180	120
Maschio SC 300	2350	10	129 to 168	122
Kuhn EL 162-300	2668	10	121 to 165	118
SICMA SPR 235	1767	9	70 to 130	91
Maschio C 230	1715	10	84 to 129	93
Kuhn EL 122	2105	9	92 to 125	98
SICMA RM 210	1217	9	40 to 85	81
Maschio U 205	1201	9	59 to 79	83
Kuhn EL 92-205	1257	10	51 to 85	81

Evaluation

Weight	Kuhn has the heaviest weight with Maschio and SICMA fighting for second.
Depth	Depth depends on the model.
HP	SICMA offers <u>the widest horsepower range</u> , allowing one machine to fit more tractors. This gives dealers more flexibility and reduces the need to stock multiple models.

FAQs

Question	Answer
What makes SICMA tillers durable?	SICMA builds its <u>own gearboxes in-house</u> , giving full control over quality and durability. This results in a stronger driveline, overbuilt to handle long-term use.
What maintenance is required?	Grease, checking bolts, its overbuilt simple and strong on purpose.

Conclusion

With in-house gearbox manufacturing, a wider horsepower range to fit more tractors, and a design built for long-term durability, SICMA delivers equipment that's built to last.
